- Battery life with 10 activations per day: 3 months
- Connection: Bluetooth 4.0 or higher
- Protection rating: IP 30
- Max RF output power: 3.4dBm

Description

The motorised cylinder, called Gear, allows you to make the entrance door of a home Smart. In fact, thanks to the Bluetooth interface, the door can be opened from a Smartphone using the UrmetSclak APP.

The Gear is positioned inside the home and is powered by 2 rechargeable batteries, it can be used with European or Scandinavian cylinders and does not eliminate the mechanical key. The Gear must be completed with a European cylinder or with the adapter for a European cylinder.
