Description

The kit includes a wireless control unit that controls 2 gates. The control unit allows for the management of up to 1500 users in local mode. By configuring the control unit in “Virtual Network” mode, it is possible to manage up to 50 gates and 5000 users without having to connect any cables between the control units. An Encoder 1088/200 connected to your PC is required to program the radio controls for “Virtual Network” mode. The control unit provides for the use of radio controls 1088/34 and 1088/35 or wireless keypads 1087/4.

The kit includes:

- no. 1 item no. 1088/2 - Wireless Easy Door Receiver Lite access control unit for 2 gates with 2-wire Bus
- no. 1 item no. 1087/4 - Wireless access control keypad module 1087
