

Note2 Wi-Fi one-family video kit, with Mikra2 entry panel and vModo video door phone, 2-wire system

1723/95

Description

The kit allows integrated management of Yokis radio building automation controls; in addition, it offers the video door phone answering machine service for up to 32 images. The IP55 outdoor entry panel is equipped with integrated proximity key reader for door opening, wide view angle camera (113° H – 92° V) and system status signalling through backlit icons.

The kit also allows using up to 4 video door phones calling at the same time and intercom calls, as well as adding a second video entry panel and a surveillance camera.

It allows forwarding calls received on the smartphone via the WiFi on the video door phone connected to the home router.
