Gateway IP/radio GATE-UP MAX, Radio UP system and Radio Power

4820432

Product specifications:
- Power supply: USB DC 5V to 5.25V 2A
- Radio protocol: Zigbee and Yokis Radio Power
- Radio frequency band: 2400.0 - 2483.5 MHz
- Maximum transmitted radio power: 10 mW
- IP network connection: Ethernet RJ45 or Wi-Fi 2.4GHz and 5GHz
- Ambient temperature: -20°C to +40°C
- Relative humidity: 0 to 90%
- IP protection rating: IP30
- Installation: table-top and wall-mounted

Description

GATE-UP MAX is the Zigbee IP/radio gateway from the Yokis UP range that allows the Yokis UP system to be connected, enabling remote control via the YnO UP app, voice commands through Alexa and Google Assistant, scenario definitions, and activation of security-related functions, cameras, and alarm systems.

Through the integrated Zigbee radio, it can directly control devices from the Yokis UP range, ensuring that the devices are isolated from the Internet and the security of the system is not compromised.

Moreover, thanks to Radio Power support, it also manages devices from the Yokis Radio Power range, allowing for the gradual evolution of existing Yokis Radio Power systems.

GATE-UP MAX does not offer backward compatibility with the following Radio Power devices listed below:
- Load control module, MD3300MRP (cod. 5454801)
- Module for electronic control units for gates, MAU500ERP (cod. 5454475)
- Module for electronic control units for gates, with external antenna, MAU500ERPX (cod. 5454476)
